(I)

Thus, I came to the conclusion that the designer of a new system must not only be the implementer and first large-scale user; the designer should also write the first user manual.

The separation of any of these four components would have hurt TeX significantly. If I had not participated fully in all these activities, literally hundreds of improvements would never have been made, because I would never have thought of them or perceived why they were important.

But a system cannot be successful if it is too strongly influenced by a single person. Once the initial design is complete and fairly robust, the real test begins as people with many different viewpoints undertake their own experiments. **(A) Some Texts**

4 Close

On Oct. 11, hundreds of runners competed in a cross-country race in Minnesota. Melanie Bailey should have 5 the course earlier than she did. Her 6 came because she was carrying a 7 across the finish line.

As reported by a local newspaper, Bailey was more than two-thirds of the way through her 8 when a runner in front of her began crying in pain. She 9 to help her fellow runner, Danielle Lenoue. Bailey took her arm to see if she could walk forward with 10. She couldn't. Bailey then 11 to let Lenoue climb onto her back and carried her all the way to the finish line, then another 300 feet to where Lenoue could get 12 attention.

Once there, Lenoue was 13 and later taken to a hospital, where she learned that she had serious injuries in one of her knees. She would have struggled with extreme 14 to make it to that aid checkpoint without Bailey's help.

As for Bailey, she is more 15 about why her act is considered a big 16. "She was just crying. I couldn't 17 her," Bailey told the reporter. "I feel like I was just doing the right thing."

Although the two young women were strangers before the 18, they've since become friends. Neither won the race, but the 19 of human kindness won the day.

(1)(nil)	5.	A. designed B. followed C. changed D. finished
(1)(nil)	6.	A. delay B. chance C. trouble D. excuse
